

Dynamic technology consultancy seeking outstanding engineers and physicists

Springboard creates and develops new technologies and devices that will shape the future. We specialise in developing next generation products for regulated markets. Example projects include drug injection and laser therapy. We are seeking technically outstanding client-facing engineers and physicists with can-do entrepreneurial minds to be part of our rapidly growing team.

Your opportunity for advancement

This role is for candidates who have already experienced project-work and are ready to step-up in technical leadership. You will develop concepts, technologies and products for leading device companies around the world, from radical start-ups to global giants. You will lead teams and present your work to senior business leaders at our client companies, interpreting the business needs, demonstrating your technical excellence and creating products in highly challenging technical development programmes. Successful candidates will help to generate opportunities of increasing size which will contribute to business growth.

We offer excellent career progression opportunities, mentoring in world-class strategies for device design and an exciting bonus package to reward achievement of ambitious company performance targets.

The Experienced Applied Physicist role

- Leading projects and delivering technical, regulatory and business progress to clients
- Taking new opportunities and developing them into business opportunities
- Identifying the fundamental engineering-science behind a multitude of technical problems
- Carrying out experiments in our laboratory and analysing data to enhance understanding
- Building first-principle calculations or advanced models to guide product design work
- Presenting to clients in a way that clearly interprets the science for their needs
- Building proof-of-principle test rigs to demonstrate a solution

Requirements

- Demonstrable experience in leading projects, teams and technical developments
- A first or 2:1 in physics from a leading university and excellent A-levels including maths
- An enthusiasm for innovation and the tenacity to succeed
- The ambition to learn and grow with a rapidly expanding company
- A hobby with a technical or practical dimension will be an advantage
- Eligibility to work in the UK. We are unable to sponsor work permits

How to apply

If you are set on a successful career and have what it takes to excel, please send a CV and covering letter explaining how you can help us achieve our ambitions via our website www.springboard.pro/careers.

Agencies Springboard does not accept candidates from recruitment agencies. Please do not contact us about recruitment.
