

Dynamic technology consultancy seeking outstanding engineers and physicists

Springboard creates and develops new technologies and devices that will shape the future. We specialise in developing next generation products for regulated markets. Example projects include drug injection and laser therapy. We are seeking technically outstanding client-facing engineers and physicists with can-do entrepreneurial minds to be part of our rapidly growing team.

Your opportunity for advancement

This role is for candidates who are studying engineering at Cambridge and seeking a temporary placement for the summer of 2015.

Your placement will be as a team member on one of our projects. We develop concepts, technologies and products for leading device companies around the world, from radical start-ups to global giants. The precise nature of the role will depend upon which projects are in progress. The duration is expected to be 6 – 12 weeks.

The summer student engineer role

- Carrying out experimental investigations and testing
- Interpreting the engineering-science behind a problem
- Identifying how practical solutions can be created
- Contributing to presentations for clients

Requirements

- Expecting a first or 2:1 in engineering from Cambridge University and excellent A-levels including maths
- An enthusiasm for innovation and the tenacity to succeed
- Ability to demonstrate practical capability, either through projects or a hobby
- The ability to communicate clearly and to explain complex concepts with clarity
- Eligibility to work in the UK. We are unable to sponsor work permits

How to apply

If you are set on a successful career and have what it takes to excel, please send a CV and covering letter explaining how you can help us achieve our ambitions via our website www.springboard.pro/careers.

Agencies Springboard does not accept candidates from recruitment agencies. Please do not contact us about recruitment.
