

Dynamic technology consultancy seeking hard-working engineers and physicists

Springboard is a technical consultancy which creates and develops new technologies and devices that will shape the future. We work on projects that improve people's lives in a diverse range of markets including medical, fluidics and advanced consumer products. We are seeking engineering interns with a passion for learning to be part of our rapidly growing team.

Your opportunity for experience and training

Our team develops concepts, technologies and products for international device companies, from radical start-ups to global giants. Working collaboratively within project teams and coached by experienced staff, we build relationships with senior business leaders at our client companies, interpreting the business needs and creating solutions to important technical development programmes.

Springboard believes in improving people's lives and being a good employer. Our internships are a great way to learn about technical consulting and our mentoring and training means you don't need to have all the answers at the start. We have an ethical policy to ensure that our work is satisfying and there may be opportunity to travel to clients or manufacturing companies.

The Engineering Intern role

- Understanding a problem and creating concepts
- Building proof-of-principle test rigs in our laboratory, testing, and demonstrating solutions
- Mechanical design, prototyping and testing
- Design for manufacture and assembly
- Reporting on work and presenting to clients
- Placements run for 10 12 weeks between July and September

Requirements

- Able to investigate a problem and develop a practical solution which benefits people
- Good at contributing to a team and communicating your work to clients and colleagues
- This scheme is only open to undergraduates studying engineering at Cambridge University. Students from any year, including first year, are welcome to apply.

How to apply

If you want to use practical engineering and science to make the world a better place, please send a CV and covering letter explaining how you can contribute to our team via www.springboard.pro/careers.

Agencies

Springboard does not accept candidates from recruitment agencies. Please do not contact us about recruitment.
